User			
String	id	PK	@id @default(uuid())
String	name		
String	firstName		
String	lastName		
String	username	UK	@unique
String	mobile		
String	email	UK	@unique
String	password		
String	walletAddr		
Boolean	isVerified		@default(false)
DateTime	createdAt		@default(now())
DateTime	updatedAt		@updatedAt

EmailTransaction			
String	id	PK	@id @default(uuid())
String	rrn	UK	@unique
String	sender		
String	transactionDate		
Float	amount		
Boolean	isUsed		@default(false)
DateTime	createdAt		@default(now())

1:N relation (userId references User.id)

1:1 mapping (EmailTransaction.rrn verifies Order.utrNumber)

Order			
String	id	PK	@id @default(uuid())
String	userId	FK	Points to User.id
Float	amount		
String	walletAddr		
String	status		@default(PENDING)
String	utrNumber		Max length 50
String	txSignature		
String	recipientTokenAccount		User's USDC address
DateTime	createdAt		@default(now())
DateTime	updatedAt		@updatedAt
DateTime	completedAt
